Title	PrintShop Mail - Barcode Plug-in Release Notes
Revision	2010/03/22

<b>1 Requirements .....</b>	<b>1</b>
<b>2 Overview .....</b>	<b>2</b>
<b>3 Known issues.....</b>	<b>5</b>

# 1 Requirements

## Requirements

- This version of the Barcode plug-in is compatible with PrintShop Mail version 6.1 for Windows, but version 7 is recommended. It is not supported by older versions of PrintShop Mail.
- The plug-in requires a hardware dongle with an OL Care date of at least June 2009; otherwise the print output will include a watermark.

## 2 Overview

### What's new in 2.0.5

[Released: March 2010]

1. New constraints for USPS Postnet.

- Bar height is now fixed at 0.125 inch.
- Recommended module width is now fixed at 0.508 mm (0.020 inch).
- Space between bars is now 1.25 times larger than the bar width.

2. Improved support for delivery point barcodes.

- USPS Postnet: The Data and Encoding properties have been replaced by properties called ZIP and Address. When ZIP represents a ZIP+4 code consisting of 9 digits, the Address property can be used to form a delivery point barcode. This works similar to the POSTNET function in PSM.

3. Small change for all barcode types:

- Default font size for human readable text is now set to 8pt instead of 12pt.

### What's new in 2.0.3

[Released: January 2010]

- USPS Postnet 5, 6, 9, 10, 11 and 12 variants have been replaced by one barcode type called USPS Postnet. The plug-in will use the appropriate Postnet variant based on the input data length.
- Any hyphens will automatically be stripped from the USPS Postnet input data.
- The recommended module width of USPS Postnet has been set to the range between 0.381 and 0.635 mm.
- Japanese Postal now accepts Japanese addresses as input data. The plug-in will extract the relevant information.
- The plug-in now exposes a property called Font Size that controls the size of the human readable text.
- Korean translation.
- [PrintShop Mail 7 only] The expression of a barcode plug-in object can now be viewed and edited through the Variables pane.
- [PrintShop Mail 7 only] Double-clicking a barcode plug-in object will now edit the associated expression.
- [PrintShop Mail 7 only] Snap Frame to Content is supported and set to Yes by default.

### What's new in 2.0.2

[Released: June 2009]

Added a number of new barcode types:

**Linear Barcodes (1D)**

Codabar
Code 11
Code 2 of 5, Code 25
Code 3 of 9, Code 39
Code 93
Code 128
EAN 8 (JAN, IAN)
EAN 13
EAN 14
EAN 128
Flattermarken
GS1-128, UCC/EAN-128, UCC-128
GS1 DataBar, RSS
ISBN
LOGMARS
MSI
NVE 18
Pharmacode
PLANET
Plessey
PZN
SSCC-18
Telepen
UPC-A, UPC 12
UPC-E
UPC Shipping Container Code, EAN/UCC-14, SCC-14, ITF-14

**Postal Barcodes (1D)**

Australian Post
German Parcel Service Label Code
Deutsche Post Identcode
Deutsche Post Leitcode
Japanese Postal
Italian Postal
KIX (Dutch)
Korean Postal Authority
RoyalMail 4State (RM4SCC)
USPS Intelligent Mail Barcode, OneCode, 4-State Customer Barcode
USPS Postnet

**Two Dimensional Barcodes (2D)**

Aztec Code
Codablock-F, Stacked Code 128
Data Matrix
GS1 DataBar Stacked, RSS-14 Stacked
MaxiCode
MicroPDF417
PDF417
QR-Code

## **3 Known issues**

### **Known issues**

-None-

### **Reporting issues**

Your reports of any unexpected behavior are highly appreciated; please refer the online Help (press F1 in PrintShop Mail) for contact info.
